Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. Two separate interviewees in 2007 stated they did not swim in the creek. Written comments received in 2005 reported observation of swimming and fishing uses. Research into the 2005 comments revealed the uses were observed on this water body segment since Nov. 28, 1975.

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The stream did not meet the depth criteria at any of the 3 sites evaluated. However, due to reported existing use (swimming), the committee recommends the WBCR use designation be assigned. Due to reported secondary contact (fishing), the committee recommends Secondary Contact Recreation be assigned.
